Learning new coding tools

PROFILE

Enthusiastic final-year student for Computer Science and Information Systems. Currently self-learning website and mobile development.

EDUCATION HISTORY

Wynberg Girls’ High School, 2018 – 2022

- **Co-leader**, **Q&A Society**, 2021-2022. Member of **Current Affairs**, 2020-2022 and **Network Operations Crew**, **Model UN**, 2021-2022.
- Took **AdMaths** as an extra course, 2019-2022.

University of Cape Town, BSc Computer Science & Business Computing, 2023 – Present

- Coursework: Computer Science, Information Systems, Mathematics, Statistics
- Member of **UCT Developers Society**, **2024-2026**
- **Class Representative** for INF3012S, **July 2025 – November 2026**

WORK EXPERIENCE

Local Peer Tutor, January 2024 – October 2024

- Mentored students in my area on the subject Mathematics (Grades 10-11)

Trainer at Logiscool, December 2025 – Present

- Year-long contract to work as a Trainer at Logiscool, a coding school for children and teenagers, teaching them programming logic, Blox code and Python.

PROJECTS

More detailed breakdowns and screenshots on my portfolio website.

ChatApp: Socket Programming | Python, PyQt6, TCP/UDP, SQLite, Wireshark | 2026, team of 3
- Designed a custom HTTP-style application-layer protocol and verified it with Wireshark.
- Built the base client/server and the desktop GUI; the system supports private chats, group chats and peer-to-peer file transfer, with bcrypt-hashed passwords.

Sprout Health | React Native, TypeScript, WatermelonDB | In progress
- Mobile app for people managing chronic illness: symptom logging with a severity scale, an appointment calendar and medication and appointment reminders.

Hotel Management System | C#, MySQL, Visual Studio
- Desktop application for bookings at the “Phumla Kamnandi” Hotels backed by a MySQL database.
